Do more to protect your users from threats.

World-class security is now included in LogMeIn Central. Take control and mitigate the risk of cyber threats with our robust security module that includes application updates, Windows updates, and now, LogMeIn Antivirus. Powered by Bitdefender, our market-leading security programming delivers peace-of-mind for customers looking to protect their valuable data.

Feature	Benefit
Anti-Malware Machine learning anti-malware keeps you safe from known and emerging threats	• Allows user to perform and schedule scans to examine endpoints in depth for viruses, including memory, hard drive, file systems, and external devices connected to the computer (i.e., USB flash drives)
On-Demand Scan Examines the computer for all viruses, including scanning memory, hard drive and external devices connected to the computer (i.e., USB flash drive)	• Defend your systems against viruses and malware with full-scan protection • Gain visibility into any potential threats
Quick Local Scan Examines virus-infected parts of the computer that are often targets of threats	• Pulse common targets for potential threats • Keep a constant watch on your critical systems
On-Access Scan Continually inspects the computer's memory and file system for threats	• Doesn't let a virus go unnoticed between scans
Scheduled Scan Set up scheduled full scans using central policies	• Minimize end-user interruption by scheduling your scans to run at convenient times.
Advanced Threat Protection Detect threats before they're publicly known using heuristic algorithms	• Watch for suspicious activity without interfering with system capabilities
Policy Assignment Configures settings centrally for groups of computers, including scanning profiles and hiding antivirus from the end user	• Customize your antivirus protection to meet the needs of your organization • Apply Silent Mode to hide antivirus from end-users
Device Control Select to automatically scan or block USB drives when connected to your computers	• Automatically scan USB drives to identify malicious software • Block USB drives to prevent users from accessing or exporting to a USB
Anti-Phishing Identifies phishing content contained in websites, email, or other forms and blocks the content	• Protects your end-users from sophisticated phishing attempts
Traffic Scan Scans HTTP traffic for Malware	• Extends protection protocols to HTTP traffic
Whitelisting Enables users to give administrator-approved addresses system access. Whitelisting allows users to specify URLs that are considered safe and should not be scanned or blocked by anti-phishing or traffic scans	• When setting policies for anti-phishing and traffic scans, maximize security with the ability to customize your security parameters utilizing Content Control • Block known phishing sites and malicious content from the web • Whitelist URLs to ensure mission critical sites are not scanned
Exclusions Excludes folders or files from all scanning through central policies	• Make your antivirus fit your requirements
Suspend Antivirus Temporarily disable antivirus on machines	• Allows you to install specific software that may be blocked by the antivirus or firewall
Firewall Controls computers' access to the network and to the Internet	• Allow access for known, legitimate applications while safeguarding your system • Protect against port scans and restrict unauthorized connection sharing
Antivirus Alerts Provides real-time antivirus alerts through Central's proactive alerting feature	• Stay on top of your risks with real-time alerts • Never let an attack go unnoticed
Update Virus Definitions Updates virus definitions to reflect deviations in known threats	• Keep up to date with the latest threats • Protect your endpoints by preventing new threats from accessing your systems • Stay one step ahead of hackers
Installation & Activation Replaces the computer's current antivirus solution* and installs LogMeIn Antivirus	• Install LogMeIn Antivirus right through your Central dashboard • Only three clicks to add protection to your endpoints
Reporting Reports on antivirus status (included in the Central Executive report)	• Gain instant insight into how your antivirus performs • Keep track of key antivirus metrics • Analyze the value of antivirus with key decision-makers
Multiple Policy Assignment Assigns differing antivirus policies to different groups in your organization	• Customize your antivirus protection within your organization • Gain the flexibility to assign the coverage you require

*LogMeIn Antivirus removes only Kaspersky software. All other antivirus software must be removed manually.
